As part of its product development policy, Roca reserves the right to modify at any time and without prior notice, any of the models and elements described in this document; Roca therefore does not guarantee the availability of those products nor does it ensure that the specifications, colours, shapes and other reproduced features are identical to the real ones. The displayed settings are merely decorative, and no technical requirements have been taken into consideration while composing them. Total or partial reproduction of the content of this publication without Roca's express authorization is prohibited.

About Roca

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings in Barcelona in 1917, we have grown into a global benchmark in sanitaryware. Roca is now one of the largest producers of bathroom products on the planet, operating 79 production facilities across five continents, employing over 21,000 people and serving over 170 markets.

Barcelona
Since 1917
79 Production facilities
5 Continents
21,000 People
170 Markets

Our designs are intuitive and intentional. Our philosophy is one of perpetual improvement, and we constantly seek to improve our product experience. Drawing on the knowledge and expertise of our global network, as well as over 100 years of experience in the sector, we develop innovative solutions that refine your bathroom while bringing comfort and simplicity to your daily routine.

Design is ingrained in everything we do. Our team of experts, often through collaborations with some of the world's leading designers, consistently create products and collections that drive innovation in the sector. These teams, along with our cutting-edge facilities, manufacturing prowess and exceptional production capacity, have allowed us to maintain our position of global leadership for more than a century. Even while achieving a presence in over 170 markets across the world, we have remained close to our roots. From the beginning, we have been active participants in Barcelona's design culture, where forward-thinking ideas and vernacular styles go hand-in-hand to create natural, intuitive solutions that enhance daily living. We will continue both to draw from and contribute to this community.

We recognise that our position of global leadership comes with responsibility. We seek to set the standard in sustainability at every step of the manufacturing process: from the acquisition of materials, through to production, logistics, packing and shipping. We design our products with sustainability and efficiency in mind, from toilets that minimise water consumption to furniture made with wood sourced from responsibly-managed forests.

We also carry out projects that help address some of the most pressing global challenges of our time. To this end, our foundation We Are Water works to promote a culture of sustainable, responsible water management, and to provide safe, reliable access to clean water in some of the most disadvantaged communities across the globe.

Our commitment to the planet extends into the social field. We are serious about our responsibility towards our employees and the communities we serve. Our aim of improving people's lives both within and outside the company has led us to promote initiatives that foster talent and improve the customer experience. We organise design competitions, such as the [jumpthegap®](#) and the One Day Design Challenge, which provide opportunities for emerging designers to showcase their creativity and expand their professional networks. And through our six international Roca Galleries, and web platform [rocagallery.com](#), we host events, talks and articles which foster dialogue around some of the planet's most important issues.

We celebrate the small, daily moments of domestic happiness. The bathroom is an intimate space of self-care which can enhance users' daily lives. At the heart of our business is the desire to develop attractive and functional solutions that contribute to improved wellbeing and better standards of living.

We make
people live the
best bathroom
experience

Smart Toilets

Roca's smart toilets offer a range of options to suit different preferences and budgets combining cutting-edge technology, hygiene and comfort to provide users with a modern and connected bathroom experience. Personalised programme settings and easy maintenance and cleaning management can be tailored to individual needs through the App Control.

Combining
cutting-edge
technology
with maximum
hygiene and
Comfort

Flushing

Exceeding water pressure limitations

Thanks to the innovative siphonic trap design, Tankless performance remains unmatched, achieving superior cleaning in low pressure conditions, enabling more sustainable water usage.

New Rimless® Flushing

Pioneering flushing experience by introducing Roca's new Rimless® *. A highly-efficient bowl designed to optimize water flow, flush performance and hygiene.

* Utility Model Patent Certificate No. 17902876: Flushing water dispenser and toilet with it.

Utility Model Patent Certificate No. 16195667: Toilet.

Hygiene

Dual UV light

Dual UV light for inner water and nozzle, effectively disinfect more than 99% bacteria, avoid the breeding of bacteria and ensure hygiene.

Electrolytic water disinfection

Electrolytic water disinfects the nozzle before and after use. The killing rate of *Escherichia coli* and *Staphylococcus aureus* can reach 99%.

Supraglaze® Ag+

Updated Supraglaze® Ag+ Anti-bacterial and easy-to-clean design to safeguard user's well-being.

Antibacterial seat & nozzle

Antibacterial seat and cover. Special material with silver nano can kill most of the bacteria.

Odour elimination

Deodorizing technology with diatom filter.

Comfort

Comfort seat

It redefines the toilet experience with a bigger inner seat to reach new levels of comfort.

Foot sensor

State-of-the-art sensor on the lower part of the toilet, which enables flushing by touching it with the foot. Ultimate convenience to activate the flushing system.

Voice control

Voice control to free your hands. 'Open the lid', you can immediately activate the smart toilet.

APP remote control APP

Remotely shut down the seat heating to save energy and generate user reports.

Night light

Configurable night light with longlife LEDs on both sides.

Super turbo dryer

The warm air released by the drying outlet under the nozzle is affected by the Coanda Effect and flows upward in the direction of the wind to accurately dry the human body. Super turbo dryer speeds up the drying for better cleaning experience.

Iconography

	Dual flush X/X liters	Toilets featuring a water-saving mechanism, with 3.8/3L, 4.8/3L, 6/4.2L, 4.5/3L, 5/3.5L or 4.8/3L flushes to choose from
	Roca Rimless® Vortex	A system that simplifies bowl cleaning while maximising hygiene, surpassing EU hygiene standards. Vortex also provides a powerful 360° whirlwind flush with silent solution, reduced splashing and aerosol effect, distributing water evenly over the entire surface

Bathroom Collections

The design and innovation of bathroom collections that transform the everyday bathroom experience is woven into the 100-year history of Roca. A combination of traditional stoneware and high-tech innovation in ceramics generate durable and anti-bacterial surfaces with new aesthetic possibilities for different shapes and designs. Technologies such as Roca Rimless® underscore the company's ongoing passion to create the best bathrooms for everyone. An extensive range of styles can be found in washbasins, toilets and bidets. Each piece is set apart by their diverse aesthetic and remarkable longevity, a key characteristic of sustainability.

Each piece is set apart by their diverse aesthetic and remarkable longevity, a key characteristic of sustainability

Fineceramic®

Lightness

Thinner walls that allow basins to be shaped with 40% less thickness.

Firmness

Innovative formulation creating parts that are 30% more resistant than conventional ceramic products.

Durability

High resistance to abrasive products and ultraviolet light.

Ever shining

Exclusive glaze that maintains the shine and performance throughout time.

Resistance

Ensure the stability under abrasive, extreme temperature and UV light.

Maximum hygiene

Non-porous surface that prevents the absorption of water and therefore, the proliferation of humidity and bacteria.

A combination of traditional stoneware and high-tech innovations in ceramics enable new aesthetic possibilities

Surflex®

Sophisticated finish

Pleasant to the touch, smooth and matt, the result of its mineral and resin composition.

Variety of shapes

Highly malleable material that adapts to the most varied profiles, angles and lines.

Jointless design

Uniform surface with no edges or borders thanks to the extraordinary plasticity of the material.

Antibacterial

Zero porosity surface that prevents the absorption of liquids and the proliferation of humidity and bacteria.

Repairable

Solid material that can be easily repaired and restored to its original appearance.

Sustainable

Composed of organic and 100% recyclable materials.

Cut to size

Easily adaptable to all types of spaces since it can be cut to size.

Roca Rimless®

Easy cleaning

By eliminating the rim, there are no longer any corners or nooks on the inside of the walls, making cleaning easier.

Hygiene

Effective and silent flush with maximum power that propels the water with more force and distributes it evenly over the entire surface.

No splashback

Slight rim on the top of the bowl to prevent water from spilling over.

Supralit®

Antibacterial

Zero porosity surface that prevents the absorption of liquids and the proliferation of humidity and bacteria.

Easy cleaning

Seats free of corners where dirt can accumulate, making maintenance easier.

Resistance

Exclusive formulation highly resistant to chemicals and ultraviolet light.

Roca Installation systems

Roca's installation systems are meticulously designed to seamlessly fit into any bathroom. These space-saving systems offer adaptable features and a range of solutions, including silent flush and adjustable options to ensure effortless installation. Water-saving is core to the design of all of Roca's installation systems.

Roca Duplo-full frame

Roca EP1

Roca PL1

Water and energy-saving features are core to the design of all of Roca's installation systems

Acoustic reduction

Isolation system that reduces condensation and noise levels when filling the cistern.

Resistance

Perfect attachment to the wall and guaranteed static resistance of up to 400 kg.

Adaptability

Compact models are available, ideal for bathrooms with space restrictions.

Compact solutions

Models that allow wall installation in spaces with a minimum fastening depth of 80 mm.

Durability

High performance flush valve with 200,000 actuation cycles guaranteed.

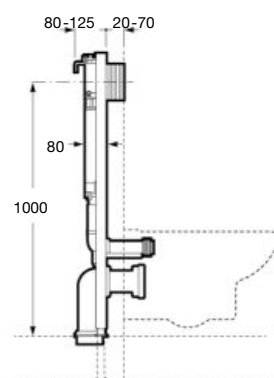

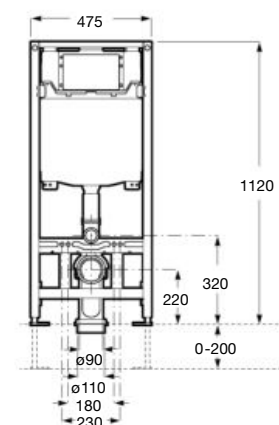

Easy maintenance

The operating plates can be easily removed from the wall, allowing an easy access to the inside of the cistern to perform any maintenance.

Duplo WC One Full Frame

Built-in structure with compact dual-flush cistern for wall-hung WC, minimum depth 107 mm. Axial distance of 180 and 230 mm. Elbow Ø90/Ø110. Metallic profile capable of withstanding 400 kg. Adjustable feet from 0-200 mm with braking system. Upper hydraulic connections. To be completed with a compatible Roca operating plate (not included).

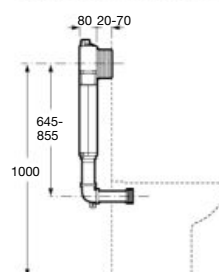

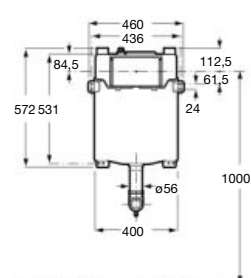

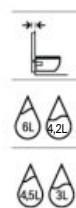

A8900700CE
4.5L Dual

Duplo WC One Naked

Basic tank one compact - Compact recessed cistern with double flush for high tank toilet, minimum depth of 80 mm. Upper hydraulic connection. To be completed with a compatible Roca drive plate (not included).

Sustainability
and safety are
integrated into
every faucet

A perfect union of precision technology and innovative design defines Roca's bathroom and kitchen faucets. Never before have there been so many possibilities – from colour, shape, finish and size – designed to appeal to a range of tastes and styles. Sustainability and safety are integrated into every faucet; non-toxic, highly resistant finishes such as Everlux PVD allow for a long life span, while energy saving systems such as Cold Start and advanced basin aerators limit and monitor water flow, giving each user peace of mind.

Profits

Durability

Ceramic cartridge tested for over one million opening and closing cycles.

Resistance

Matt finishes based on polyester resins that are highly resistant to external agents, UV radiation and corrosion, complying with the most demanding European regulations and never losing their colour.

High-quality materials

Electrolytic coating that guarantees an impeccable surface despite wear and tear and makes the faucets easy to clean.

Acoustic control

Sound reduction system integrated in the cartridges and faucets to limit the noise of the water.

Homogeneous flow

Aerators with excellent aerated jet quality, even under complex pressure conditions. They come with anti-limescale protection for easy cleaning and maintenance.

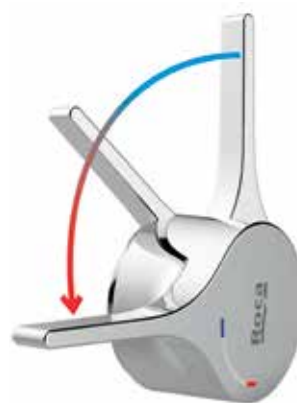

Safety

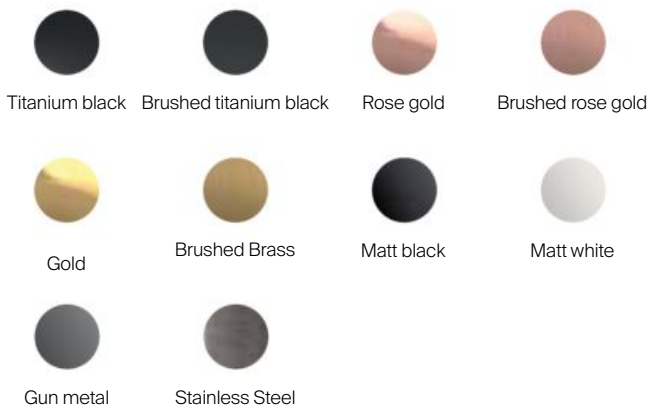

Protective filters included in the aerators that stop any particles coming through from the mains supply.

Cold Start

Energy savings

Cold water frontal opening that avoids unnecessary energy use, providing up to 45% more energy savings than conventional faucets.

Everlux

Sophisticated

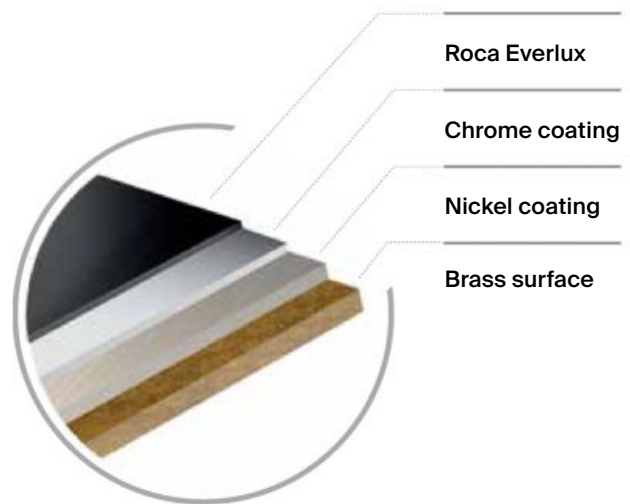

Exclusive and fashionable coating that affords distinction and uniqueness to the bathroom.

Sustainable

Purely physical technique that does not require harmful chemicals or generate water pollution during its production process.

Resistant

Additional layer on top of the chrome, based on very hard metals ensuring the surface is extraordinarily resistant to scratches and cleaning products.

Sophisticated finish

The sophisticated Everlux finish is obtained by means of an innovative physical vapor deposition process, through the ionization of metals and noble gases, which are combined to create a fine metallic coating with outstanding properties.

High resistance

This last coating, with a minimum thickness, based on extremely hard metals such as titanium or zirconium, is uniformly deposited over Roca's high-quality galvanized chrome plating, resulting in a surface with great hardness and extraordinary resistance to scratches and impacts.

Wide range of colors and effect

Through controlled variations of the process, Roca has been able to create a range of colors with a gloss or matt finish to offer multiple combinations in the creation of sophisticated and highly resistant bathroom spaces.

Sustainable

Moreover, as this is a purely physical technique, the Everlux finish is obtained without needing to use any harmful chemicals during its production process, being particularly respectful with the environment.

Shower programmes

Universal
shower solutions
designed for any
bathroom space
and user needs

A simple shower can be transformative without the need for a large space or complicated installations. Designed for any bathroom space and user needs, Roca's shower systems offer universal shower solutions. The ultimate soothing and cleansing experiences come in the form of handheld showers with multiple spray options or ceiling-mounted rain showers. Thermostatic mixers are designed for any type of wall and shower space, while smart shower solutions help reduce energy and water consumption and allow for programmable shower options. Elegant and modern designs, including chrome and matt black finishes on shower fixtures, add style and enhance the overall experience.

Thermostatic faucets

Instant temperature

Quick Reaction® system that delivers water at the desired temperature in seconds and always keeps it constant.

Precision

Ergonomic control that allows the user to select the temperature quickly and precisely with a simple movement.

Safety at 38°C

Device that prevents the water from exceeding 38° by default, preventing it from coming out too hot.

Anti-burning

Safe Touch® technology that prevents the faucet body from overheating, to avoid burning when touching the metal.

Anti-scalding

Ceramic cartridge that blocks the flow of hot water if the cold water supply is interrupted to avoid scalding.

Efficiency

Desired temperature instantly to avoid wasting water and energy while waiting.

Mirrors and lighting

Mirrors	
Moon	128

Mirrors and lighting

Good, focused lighting and a clean, spot-free mirrored surface help make the daily routine easy

A good mirror and proper lighting are as essential in the bathroom as a toilet. This is the space where your day begins and ends, where you take a moment to yourself and get ready for what's next. Roca's extensive collection of mirrors include a variety of designs and finishes for different bathroom styles. Good, focused lighting and a clean, spot-free mirrored surface, in the form of mirrored cabinets, small magnifying mirrors or illuminated mirrors with integrated LED lighting and a demister, help make the daily routine easy.

Nature light

Models with high-efficiency AC LED technology to provide neutral and natural light.

Finishes

In Gloss white or Nordic ash, a wide range of options and a broad palette of fashionable colours.

Efficiency

Mirrors with LED lighting that consume less electricity.

Technology

Models available with lights, demister device, adjustable lighting or perimeter lighting.

Design

Wide variety of round, square or rectangular options to suit any style.

Bathtubs

The right bath can become the centrepiece of any bathroom space. A place to disconnect, soak and rejuvenate, baths need to be both ergonomic and elegant be they freestanding or inset. Roca offers a wide selection of baths available in classic, vintage or modern designs. These baths are crafted using a variety of materials, including cutting-edge components that enable thinner and more curvilinear shapes. Additionally, they incorporate advanced features to enhance hygiene and ensure increased safety.

[illegible]

Surfex[®] Bathtub

The warm, matt surface of this innovative mineral-based compound is perfect for creating exclusive baths with a sophisticated touch.

Repairable

Compact material that can be easily repaired and restored to its original appearance.

Anti-slip

Textured surface that guarantees the highest anti-slip properties, while offering a very natural and pleasant sensation to the touch.

Efficient

Thermal insulating material that maintains the water temperature for greater energy savings.

Antibacterial

Zero porosity material, exclusive to Roca, that prevents the absorption of liquids and the proliferation of humidity and bacteria.

Sustainable

Composed of organic and 100% recyclable materials.

Commercial solutions

Urinals	169
Caring	172

Public bathrooms

Touchless

Proton wall-hung integrated urinal, Loft basin sensor faucet, Sentronic sensor soap dispenser.

The “Touchless” solution designed by Roca for public spaces meets the latest safety and prevention standards, aiming to provide hands-free access to sanitary space products for maximum hygiene and without fear of high-frequency intensive use. Products such as taps, operation panels, urinals, soap dispensers and hand dryers are all equipped with infrared sensors, which can provide greater safety for users of public bathroom with high-volume while being environmentally friendly and saving energy.

Semi-public bathrooms

In bathrooms of hotels, restaurants, offices and any other type of semi-public facilities, the overall safety of users must be ensured. Roca's "Touchless" solution minimizes the risk of virus transmission, improves energy efficiency, and is easily configured in new and renovated buildings.

Loft basin sensor faucet.

Private bathrooms

Touchless

We all want to enjoy the highest level of security at home. Roca's "Touchless" solution can be easily configured in the home bathroom, adding extra security to the health of the family. Thanks to the configuration of infrared sensor, the user can control the water of the faucet and the flush of the toilet with a simple gesture without direct contact, thus avoiding the spread of viruses and the breeding of bacteria.

Urinals

Being a company engaged in the design, production and commercialization of bathroom products for construction and interior design, we are able to provide integral solutions for very different establishments, with products that ensure the maximum quality and durability with the minimum water and energy consumption.
